

ultra high frequency induction quenching for knife

Hengxin Science and Technology Limited

Hengxin is experienced in Induction Heating Machine and Induction Heating Power Supply, induction heating equipments can be used in induction heating service, induction heat treatment, induction brazing, induction hardening, induction welding, induction forging, induction quenching, induction soldering induction melting and induction surface treatment applications
<http://www.hengxinkeji.com>

Our ultra-high frequency (UHF) induction heating can be used for heating the tiny and very small workpiece as its max frequency can be 1.5MHz. Some harden or quench work is also need these ultra high frequency to reach a small quenching depth like 0.2mm to 2mm.
